## Masked Emotions Charades

Have children form two teams. Each team is given a list of emotions. Be sure everyone is staying 6 feet apart.

Each team will choose who will share each emotion with the other team while wearing a mask. The other team has to guess what the emotion the child is showing .

If children have a hard time, encourage them to use their entire body to show the emotions.

Afterwards, ask the children how hard it is to figure out how others are feeling while wearing masks. How can we help each other out if we cannot see how the other person is feeling as well?
